PROFILE

PHP-focused backend and junior full-stack developer experienced in PHP, MySQL, and web apps. Passionate about scalable systems and performance. Junior Software Engineer with hands-on experience in PHP-based web application development. Completed internship and worked professionally at Winky Tech Limited, contributing to real-world projects using PHP, MySQL, JavaScript, HTML, CSS, and Bootstrap. Experienced in building dynamic websites, RESTful functionalities, and custom PHP frameworks. Strong foundation in problem solving, database design, and responsive UI development, with a passion for continuous learning and delivering reliable software solutions.

EXPERIENCE

Winky Tech Limited

Nov 2025 - Jan 2026

Junior Software Engineer

Dhaka

1. Developed and maintained web applications using PHP, MySQL, HTML, CSS, Bootstrap, and JavaScript 2. Worked on backend logic, database design, and CRUD operations 3. SKILLS

PROJECTS

Scholar Lab Foundation

<https://scholarlabfoundation.tech/>

This is a NGO Website HTML, CSS, Bootstrap, JavaScript, PHP, PHP Custom Framework, MySQL was using this project.

EDP NGO

<https://edpngo.org/>

EDP is a NGO Platform site. HTML, CSS, Bootstrap, JavaScript, PHP, PHP Custom Framework, MySQL was using this project.

Little's Online Mart

<https://littleonlinemart.com/>

Little's Online Mart is an e-commerce site. HTML, CSS, Bootstrap, JavaScript, PHP, PHP Custom Framework, MySQL was using this project.

Rxvetsheba Web App

<https://rx.vetsheba.com/>

HTML, CSS, Bootstrap, JavaScript, PHP, PHP Custom Framework, MySQL was using this project.

Faith Text

<https://faithtex-bd.com/>

HTML, CSS, Bootstrap, JavaScript, PHP, PHP Custom Framework, MySQL was using this project.

House Rent Site

<https://github.com/ashikrazz/House-Rent-Site.git>

HTML, CSS, Bootstrap, JavaScript, PHP, MySQL was using this project.

National Safari Park

<https://github.com/ashikrazz/National-Safari-Park.git>

HTML, CSS, Bootstrap, JavaScript, PHP, MySQL was using this project.

Virtual Assistant

https://github.com/ashikrazz/Virtual_Assistant.git

This project was made using Python.

Face Recognition Attendance System

https://github.com/ashikrazz/Face_recognition_attendance_system.git

This project was made using Python.

Face Mask Detection

<https://github.com/ashikrazz/Face-Mask-Detection.git>

This project was made using Python.

Vaccination System

https://github.com/ashikrazz/Vaccination_System.git

This is user Interface desktop application. I used Java and MySQL for this project.
